

Annual award for OSSD member publication in **Biology of Sex Differences**

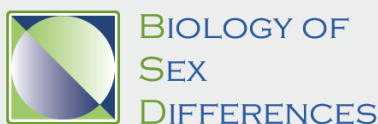

Biology of Sex Differences is the official journal of the [Organization for the Study of Sex Differences](#) (OSSD), dedicated to promoting research in, and knowledge of, sex and gender differences in biology and medicine.

BioMed Central, publisher of *Biology of Sex Differences*, and the OSSD are establishing an annual award to highlight the best research published in the journal by OSSD members. The prize will be awarded to the article that is deemed most worthy in terms of novelty, general interest and significance, by the journal's Editor-in-Chief, [Art Arnold](#), and an accompanying panel of researchers.

The prize will be a waiver of the article processing charges (APC) for a future publication in the journal, and a £100 Amazon voucher. The prize will be awarded at the beginning of each new year, to an article published between January 1st and December 31st of the previous year.

Authors must state in their cover letter that they would like to be considered for the award; research articles from all members of the OSSD are welcome.

Biology of Sex Differences is an online, open access journal published by BioMed Central, and is currently the only biomedical journal dedicated to research into sex differences. The journal is supported by an eminent, international [Editorial Board](#), and the full aims and scope of the journal can be found [here](#). For more information on joining the OSSD, visit the organization's [website](#).
