

# OSSD/IGM

2019 WASHINGTON, DC

## Sex differences in nicotine and smoking: From brain and behavior to smoking cessation

A growing body of research on nicotine, smoking and addiction has been uncovering differences between men and women. In this symposium research on those sex differences will be presented – from the role of biologic and behavioral factors to smoking cessation. This research shows that factors giving rise to nicotine addiction and those that maintain the addiction often differ between men and women.

Second Joint OSSD/IGM Meeting  
Washington, DC, USA  
May 5 – 8, 2019
