

**Dr. Roberta Diaz Brinton** leads the Center for Innovation in Brain Science at the University of Arizona. She is an internationally recognized expert on sex differences in the aging brain and women and their risk of Alzheimer's disease. Her scientific discoveries have led to the development of innovative therapeutics to prevent, delay and treat Alzheimer's disease. Brinton is developing the first regenerative therapeutic to regenerate the degenerated brain. Dr. Brinton earned her Ph.D. as an NIH Predoctoral Fellow at the University of Arizona and went on to Rockefeller University as an NIH Postdoctoral Fellow. Brinton is a Regents Professor of Pharmacology, Neuroscience and Neurology at the University of Arizona College of Medicine – Tucson.

Brinton serves on the Alzheimer's Drug Discovery Foundation (ADDF) Board of Governors and the National Institutes of Health scientific boards and panels. Her research is funded by the National Institute on Aging, Alzheimer's Drug Discovery Foundation, Alzheimer's Association and the Women's Alzheimer's Movement (WAM).

Her honors include the ADDF Scientist of the Year, the Melvin R. Goodes Prize for Excellence in Alzheimer's Drug Discovery and the 2010 U.S. Presidential Citizens Medal, the highest civilian honor for her work in improving science and technology education for underprivileged students.
